

# | INFORMATION SECURITY POLICY

**This policy defines the objectives of information security in Valmet Automotive and the strategy to achieve them in compliance with the business strategy. It is supplemented by procedures, guidelines and standards. Information security provides rules, measures and controls to ensure Confidentiality, Integrity and Availability of information assets. The scope of the policy includes the Valmet Automotive Group and relevant suppliers and partners. Information Security objectives is to ease and safeguard the achievement of operational objectives and to enable and support Valmet Automotive business drivers.**

- Valmet Automotive is committed to fulfill the information security requirements which are pointed by business and information security objectives, applicable laws and regulations and risks related to information security.
- Information security in Valmet Automotive is the responsibility of top management. To ensure sufficient resources and level of security, supporting roles and responsibilities have been declared. The constant change of information security environment is understood and that is why the management of Valmet Automotive is committed to continuous improvement in the field of information security. This is done by reviewing information security policies and information security management system on an annual basis and making required adjustments. Information security related issues are communicated to all personnel on a regular basis to raise awareness.
- This policy and Valmet Automotive information security management system are aligned with the ISO / IEC 27001 standard.
