

# | SUSTAINABILITY POLICY

**Our Sustainability Policy aims to integrate sustainable development into all Valmet Automotive activities. For us, sustainability consists of Environmental and Social responsibility, Governance and economically sustainable business. We commit to maximize the positive contribution against climate change and minimize our impact on the environment.**

- We commit to fulfill compliant obligations relevant to our operations
- We commit to ensure sustainable economic growth and creating value for our stakeholders
- We promote environmentally sustainable company culture, where we enhance responsible use of natural resources by increasing efficient usage of energy and materials
- We endorse awareness and social responsibility among our internal and external stakeholders – educating and motivating them to act in a sustainable manner
- We are constantly reviewing our operations and improving our measures for environmental protection, in order to prevent environmental degradation
- We apply the best practices to utilize the synergies between our businesses
- We demand our suppliers to comply with our Supplier Code of Conduct
