

VALMET AUTOMOTIVE

INFORMATION SECURITY POLICY

The purpose of this policy is to define how Valmet Automotive Plc protects and ensures the confidentiality, integrity, and availability of information assets. Information security supports our business objectives and helps maintain trust with customers, partners, and employees. This policy applies to all employees, contractors, and suppliers who access, process, or manage Valmet Automotive Plc's information assets, systems, and networks.

- Information security management system (ISMS) is based on the ISO/IEC 27001 standard and continuously improved through regular monitoring, internal audits, corrective actions, and management reviews.
- We are committed to comply with applicable laws, regulations, and contractual requirements related to information security.
- Top management ensures that adequate resources, roles, and authorities are assigned to maintain and improve the ISMS.
- We are committed to responsible information handling, which we ensure through regular training and awareness programs. Furthermore, employees are required to follow approved procedures and immediately report any suspected security incidents.
- We are committed to ensuring all information is protected from unauthorized access, disclosure, alteration, or destruction. To achieve this, access to systems and data is strictly granted on a need-to-know and least-privilege basis
